

To whom it may concern,

I recently became an XM subscriber specifically for the reason of being able to receive an indepth variety of music, entertainment, news and local weather and traffic programs that are to my liking. This is a service I choose to pay for so that I can hear what I want to hear without having to be subjected to mainstream media commercialization and propaganda. One of the main reasons I choose to pay for XM is that it gives me access to my local weather and traffic. Please do not oppress my right to have access to XM radio, along with local weather and traffic, because it is disturbing the very organization I am trying to get away from. If the NAB cared more about what listeners wanted to hear then there wouldn't be the need for XM. Thank God that XM came up with a solution to the present dismal radio broadcast situation that provides me with the kind of programs that I demand and deserve.

Moreover, NAB should not be allowed to tell me what services I can receive if I'm paying for them. XM provides great music and entertainment that makes driving in traffic more tolerable, as well as, traveling more safe and enjoyable. I love XM radio!

Sincerely, Trudy Dehner
